

NovaTech Solutions — CRM Implementation

Business Analysis Portfolio Case Study

Role / Context

Business Analyst | B2B SaaS | CRM Implementation | Simulated portfolio project

Business Problem

NovaTech manages leads and customers across spreadsheets and communication channels. This creates duplicate records, missed follow-ups, poor customer visibility and manual reporting.

Objectives

Centralize customer data, improve lead ownership and follow-up management, track interactions, improve pipeline visibility and reduce reporting effort.

BA Approach

Stakeholders → Elicitation → AS-IS → Pain Points → Requirements → User Stories → TO-BE → Gap Analysis → Prioritization → Traceability → Success Metrics.

Deliverables

Project overview, stakeholder matrix, interview notes, AS-IS/TO-BE process models, requirements, business rules, user stories, gap analysis, MoSCoW prioritization, RTM, BRD and KPI targets.

Portfolio disclaimer

All company information, stakeholder responses and metrics are illustrative. This project does not claim real client experience.

Representative Requirements

ID	Requirement	Priority
FR-001	The system shall allow authorized users to create a new lead.	Must Have
FR-002	The system shall allow users to update lead information and status.	Must Have
FR-003	The system shall allow Sales Managers to assign leads to representatives.	Must Have
FR-004	The system shall record customer interactions against a lead/customer record.	Must Have
FR-005	The system shall allow users to schedule and view follow-ups.	Must Have
FR-006	The system shall maintain a centralized customer profile and interaction history.	Must Have
FR-007	The system shall allow managers to view the sales pipeline by status and owner.	Must Have

AS-IS

Marketing → Email → Excel → Sales Follow-up → Email/WhatsApp → Excel → Manual Reporting

TO-BE

Lead → CRM → Assignment → Sales Activity → Interaction History → Follow-up → Pipeline → Reporting
